

# Win the deals you keep losing.

*An independent trust layer that vets you, vouches for you, and stands beside you, so buyers feel safe saying yes.*

## THE PROBLEM

You do strong work with real references and still lose winnable deals. They don't stall on value or price. They stall on trust: *"Can we rely on an offshore team? Who's accountable if it goes wrong?"* That's the most expensive kind of loss: qualified, interested, and gone.

## WHAT YOU GET

- The badge** Pass our five-pillar vetting, earn a revocable trust mark for your site and proposals.
- The directory** A place buyers search for vetted teams, and where intros come to you.
- Accountability** A named US contact who owns the relationship in writing and joins the calls where deals are won.

## WHY IT CARRIES WEIGHT

Every team clears a documented rubric, and the mark is **revocable** the moment a team slips. It links to a live verification page, so it can't be faked or outlast its vetting.

TECHNICAL	PAST WORK	REFERENCES	COMMUNICATION

## TIERS

<p><b>Verified</b></p> <p>Badge + directory.</p>	<p><b>Backed</b></p> <p>Adds the US contact, live-call coverage, co-sell support.</p>	<p><b>Managed</b></p> <p>Adds a dedicated senior liaison and an optional SLA-backed arrangement.</p>
--	---	--

## HOW YOU PAY

A one-time vetting fee, monthly membership by tier, and a success fee on deals we source or help close. **Pay-for-performance on the deals you'd have lost without us.**

## THE SAFETY LINE

You keep the client relationship and every dollar of the work; payment never touches us. The pitch to buyers is exactly true, with nothing to hide.

## IN THE DEAL

- 1 The buyer hesitates.** Qualified, interested, and quietly unsure about relying on an offshore team.
- 2 You show the badge.** It links to your live verification page: current status, tier, what was vetted, and when it's next reviewed. The buyer checks it in thirty seconds.
- 3 We stand beside you.** On Backed and Managed, your named US contact joins the buyer call, answers the accountability question directly, and puts it in writing.
- 4 The buyer says yes.** You sign the contract, run the work, and keep every dollar. We take a success fee only on deals we sourced or helped close.

## WHAT BUYERS SEE

Every badge resolves to a public verification page. No login and no PDF, just a live status a buyer's procurement team can check on their own.

If a team is suspended or revoked, the page says so. The mark can't be faked or outlast its vetting.

## THE MATH

Count the deals that stalled on trust last year and multiply by your average contract value. That's what hesitation costs you. Against it: a **\$1,000 one-time vetting fee**, membership from \$50/mo by tier, and a success fee only when we source or help close. Agency-sourced deals pay 0%. One recovered deal typically pays for years of membership.

## COMMON QUESTIONS

### "Isn't this pay-to-play?"

The fee buys the review, not the result. Teams fail, and the fee isn't refunded. The rubric is published, and the badge is revocable. One bought badge would end the business.

### "What if we don't pass?"

You get written findings either way. A conditional result names the one fixable gap and lets you resubmit that pillar; a decline explains why, and you can reapply after 90 days.

### "Do you get between us and our clients?"

No. Contracts and payments stay entirely yours. The liaison covers pitch, kickoff, escalation, and milestone-gate calls with a written SLA. Never standups, never your delivery. Your team stays yours.

### "How long does vetting take?"

Most teams complete review in 2–3 weeks once evidence is submitted. The intake itself takes about 15 minutes.
